Protection for fire-fighter:	Wear suitable protective equipment in fire-fighting.
<b>6.Accidental release measures</b> Personal precautions, protective equipment and emergency procedures:  Environmental precautions:  Methods and material for containment and cleaning up:  Prevention of second disaster:	Avoid formation of dust. Ensure adequate ventilation. Keep unprotected persons away. Although the substance has no acute toxicity, it is advised to avoid contact with skin, eyes, and clothing – wear suitable protective equipment. Avoid inhalation of dust. It is advised that in the event of an accidental release the product should be prevented from reaching the sewage system or any water course and penetrating the soil. Dispose of spilled material in accordance with the relevant regulations.  In any case avoid dust formation. Sweep all spilled material or use an appropriate industrial vacuum cleaner. Collect spilled material in suitable containers or closed plastic bags for recovery or disposal. For more information on exposure controls/personal protection or disposal considerations, check section 8 and 13 of this safety data sheet.
<b>7.Handling and storage</b> Handling: Technological countermeasure (local ventilation/ General Ventilation etc.) Safety precaution  Avoid contact Hygiene measure  Storage: Safety storage condition  Safety packaging material	Provide a local dust collection system in the places where dust can be generated. Provide dust protective mask in the handling position.  Do not handle until all safety precautions have been read and understood. Work by wearing suitable protective equipment. Check section 10. Avoid inhalation or ingestion. General occupational hygiene measures are required to ensure a safe handling of the substance. These measures involve good personal and housekeeping practices (i.e. regular cleaning with suitable cleaning devices). No eating, drinking and smoking at the workplace. Wash hands after use. Remove contaminated clothing and protective equipment before entering eating areas. Shower and change clothes at end of work shift. Do not wear contaminated clothing at home. Do not blow dust off with compressed air.  Store in well ventilated dry area with low humidity and sealed state.  Establish whether the container conforms test standard on a voluntary basis.

## 8.EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering controls:	Prevent formation of dust where possible. Ensure appropriate ventilation/exhaustion at machinery and places where dust can be generated. Any deposit of dust which cannot be avoided must be regularly removed using preferably appropriate industrial vacuum cleaners or central vacuum systems. Waste air is to be released into the atmosphere only when it has passed through suitable dust separators. Waste water generated during the production process or cleaning operations should be collected and should preferably be treated in an on-site waste water treatment plant which ensures efficient removal.
Exposure control limits Effect of over exposure: ACGIH(2012)	0.5mg/m <sup>3</sup> TLV-TWA (Antimony and compounds, as Sb) 100mg/m <sup>3</sup> TWA-STEL (Ethylene Glycol, The threshold limit value as the aerosol)
Personal protective equipment: Respiratory protection Hand protection Eye protection Skin and body protection Special precaution statement	Dust protective mask(As appropriate) Protective gloves Protective glasses Protective high boots and cloth Avoid environmental discharge.
